ORIGAMI RISK

Fully-Integrated Claims Administration

From first notice of loss to settlement, Origami provides scalable, cloud-based claims administration software for digitizing the entire claim life cycle for all P&C lines of business. Leverage the power of robust automation tools, configurable dashboards, advanced analytics, and fully-integrated digital engagement capabilities to streamline workflows, ensure compliance, inform decisions, and enable collaboration with key stakeholders — both internal and external.

Automated Claims Workflows

- Free staff from repetitive, time-consuming activities associated with claims management
- Configure powerful workflow tools to automate processes, standardize procedures, and increase efficiency
- Automate any event — such as initial claim data entry, a change to claim details, a payment, or when reserves exceed a defined threshold — to trigger alerts, diaries, tasks, claimant communications, or financial approval routing

Document Management

- Make it easier to find critical files and move to a paperless environment by centralizing storage and production of claims-related documentation and emails
- Scan and upload paper documents, then attach the files to any record in Origami
- Email file attachments directly to claim records

Analytics and Reporting

- Make data analysis straightforward and fast
- Use dashboards, reports, and graphs to gain actionable insight and assess performance
- Easily compare claims to others in the system or benchmark against industry data
- Automate report distribution to reduce administrative costs

Adaptable Digital Experience

- Empower your agents and insureds/members with self-service powered by a configurable mobile and web experience tailored for each audience
- Communicate seamlessly with automated email and text communication channels to keep critical stakeholders up to date on claim status and action items

Seamless Data Integration

- Integrate your insurance technology platform with any third-party application without the need for custom development, including vendor or internal policy systems, payment processing, general ledger, medical bill review systems, and more

Workers' Comp Regulatory Reporting and Compliance

- Save valuable adjuster time and resources by letting Origami ensure you are equipped with the latest U.S. compliance information
- Origami is compliant with all jurisdiction's EDI requirements, automates CMS 111 mandatory insurer reporting, calculates AWW, facilitates indemnity benefits calculations, and helps ensure OSHA reporting compliance
