

ORIGAMI RISK

Optimize Your Patient Safety Maturity Journey

Implement Easy Incident Reporting Process

Simplify reporting for patient care givers.

Origami Risk >> Encourages a transparent culture by using simple forms, easily accessed from any device and submitted anonymously.

Take a Comprehensive View

Eliminate Data Silos.

Origami Risk >> Single platform enables data sharing across departments to encourage an enterprise-wide approach to addressing patient safety issues.

Automate Processes and Communication

Increase efficiency and decrease administrative burden.

Origami Risk >> Configurable workflows automate tasks related to incident reviews, notifications, and due dates to ensure a consistent process.

Improve Processes Through Root Cause Analysis

Adopt a systematic approach.

Origami Risk >> Leverage built-in process improvement tools such as Root Cause Analysis (RCA) including 5 whys, and fishbone diagrams as well as HFMEA. Seamlessly kick-off a process improvement from a reported incident.

Engage Teams in Meeting Patient Safety Goals

Create a culture of patient safety.

Origami Risk >> Conduct Safety Huddles to engage staff, document patient rounds, and create transparency in tracking patient safety goals with at-a-glance dashboards enabling staff to see real-time metrics and patient safety educational information.

Monitor and Optimize

Proactively monitor trends to assess the impact of process improvements.

Origami Risk >> Schedule reports and configure dashboard widgets that display in easy-to-read, interactive charts and graphs.
