

Maximize productivity with easy-to-use risk and safety software

Centralize control over **insurable risks**; **environmental, health, and safety compliance**; and **governance processes** to streamline risk management and safety programs across multiple departments or sites. By eliminating paper-based processes and reducing administrative tasks, **Origami Risk** provides you with a clear understanding of the **financial and operational impacts of risk**, helping to guide **informed decisions**, eliminate burdensome processes, and ultimately, improve **safety and productivity**.

Risk Management Information System (RMIS)

Expedite communications with insurers, so you can focus on **minimizing risks** and **negotiating better premiums**.

- **Improve hiring and employee retention** through technology-supported **incident reporting** and **resolution management** and focused safety programs.
- **Deliver accurate risk and insurance data sets** across plant locations allowing you to make **well-informed risk transfer decisions**.
- **Centralize incident data** from employee injuries, near misses, environmental spills, and other causes to **mitigate risks** and **resolve issues before they escalate**.

Environment, Health and Safety (EHS)

Instill a **culture of safety** to ensure employees are **engaged, retained**, and go home safely.

- **Gain instant visibility into safety data** to determine top risks and hazards (e.g. ergonomics) and implement controls to **prevent injuries** and **improve safety**.
- **Ensure control of hazardous energies** with LOTO and proper **machine guarding** for all critical equipment to **reduce incidents and injuries**.
- **Convert manual and paper processes to digital** and **automate workflows**, saving you time and allowing you to focus on more **impactful safety conversations** with your workers.

Governance, Risk and Compliance (GRC)

Facilitate **compliance with industry standards** and ensure **seamless governance processes** across all levels of your operations.

- **Attain a comprehensive understanding** of your operational resilience and **monitor the entire program** in one solution.
- **Identify and mitigate risks** to prevent injuries, downtime, and fines, in turn **optimizing operations and efficiency**.
- **Enable real-time data collection and analysis** so that you can **identify trends, assess risks**, and turn raw data into **actionable insights**.

Integrated Risk Management (IRM)

Understand the relationship between **risk and safety programs** and gain a comprehensive view of your **risks and controls** across departments.

- **Track incidents and claims** with your RMIS to inform the biggest safety risks and empower safety programs to **strengthen safe working environments**.
- **Trigger automatic compliance audits** after environmental spills, containment failures, or other events to stay aligned with **regulatory requirements**.
- **Uncover the true financial impact of incidents** through **claims costs** and the **total number of days lost**.

“Origami has been able to meet our needs across the entire company, enabling us to manage EHS, workers’ compensation, and risk management on a single platform, from incident creation to reporting functionality.”
