

Lower costs, gain key insights, and unify the risk management process

Government and public entities face many unique challenges – establishing operating efficiencies, eliminating blind spots, reducing risk exposure, while operating on a rigorous budget. Harness the full power of your insurance, claims and safety data to more effectively mitigate risk, control costs, and improve processes. Configurable, intuitive, and secure, Origami Risk delivers proven technology solutions capable of supporting a more holistic approach to managing the risks associated with the range of services public entities provide.

Control incident reporting and claims administration and management

Report incidents quickly and accurately, and seamlessly improve claims outcomes.

- Improve timeliness of incident reporting and accuracy of incident data captured with standard web and mobile forms
- Streamline incident-related communications and workflow, including corrective actions and report distribution
- Consolidate all claims and incident data and leverage dashboards to analyze data, spot trends, take actions to prevent losses and close claims faster
- Integrate with third-party software, allowing for the secure exchange of data between HR, accounting, and payroll applications, as well as systems used by medical billing and nurse case management providers.

Gain visibility through location-specific data management

Take advantage of the multiple hierarchy capability to track separate financial vs. physical organizational structures, or reconcile point-in-time, as-of reporting to display the way locations were organized at that point in time

- Centralize location-specific data
- Properly insure and automate exposure collection
- Simplify reporting and analytics by location
- Deploy configurable inspection forms and workflows

Save time by eliminating cumbersome processes and spreadsheets

Improve data quality and transparency while gaining significant efficiency in processes.

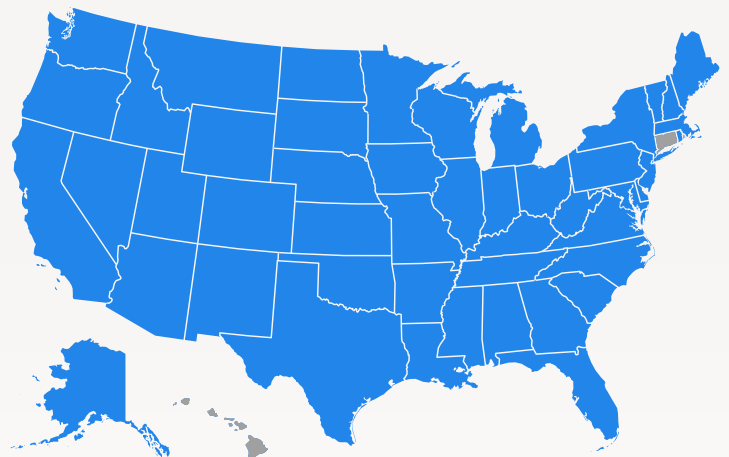

- Track Certificates of Insurance (COIs) and vendor compliance
- Control data integrity, task completion, and communication channels
- Conduct audits, inspections, and observations directly from the field
- Create greater autonomy with faster, data-driven decision making

Save time by eliminating cumbersome processes and spreadsheets

Origami's is built on a cloud-native, single Integrated Risk Management platform that ensures all clients benefit from the latest technology. Regular product releases and API flexibility foster innovation, while our robust vendor ecosystem expands capabilities. Selfservice configuration tools empower users and reduce IT dependencies, promoting agility in your operations.

“Having all of our safety information in one place —instead of manually entered into multiple systems — is revolutionary. We now have instant visibility into incidents and the ability to follow up with operators. People at our organization know that when they submit items, action will be taken.”
