The Origami Risk RMIS solution suite empowers risk professionals to:

- Oversee and execute all aspects of risk and insurance management from a single system, enabling you to more effectively prevent losses, control claims costs, improve renewals, reduce your total cost of risk, save time, and make data-driven decisions.

- Unify all risk data in a centralized location, driving transparency and gaining actionable insight based on real-time reporting.

- Leverage automated workflows, tasks, notifications, and other tools to reduce manual efforts and allocate resources more efficiently.

Highly configurable

Adapt Origami Risk to match your organization's unique processes and preferences. Making changes to **fields, labels, forms, data mappings, batch import or export processes, point-in-time reports, loss triangles, notifications, alerts**, and **security permissions** — to name just a few components — can all be done through the **front end of the system.** No coding is required.

Ongoing innovation

Regularly scheduled product releases on a **single code base** provide upgraded capabilities to meet your evolving risk management needs.

True integration

Built on a **single, unified platform,** Origami Risk connects your **insurable risk data** with **non-insurable and safety-related data,** driving collaboration, visibility, and **insight-driven decision-making** across the enterprise.

Client-centric service

We deliver a collaborative implementation experience and ongoing support that connects you with a **dedicated, account-specific team of experts** for the optimal level of support.
