

Smarter data. Smarter workflows. Smarter insights.

The real barrier isn't AI adoption.
It's workflow and data readiness.

Organizations are under pressure to modernize. Everyone is talking about AI. Few are deploying it safely and effectively. AI does not create clarity on its own. It depends on structured workflows, clean data, and governance controls.

- If workflows are manual or disconnected, AI amplifies noise instead of insight.
- If data is fragmented, AI cannot deliver trustworthy outcomes.
- If governance is unclear, AI introduces risk instead of reducing it.

High-stakes environments require more than hype. They require practical, embedded intelligence.

Our approach: Embedded. Unified. Controlled.

Origami Risk delivers AI where it matters most — inside the workflows teams rely on every day.

Embedded in the flow of work

AI operates directly within claims review, incident investigation, risk assessments, audits, underwriting processes, policy administration, and billing workflows, not in a separate layer or window. Intelligence appears exactly where work is happening.

Unified data across the enterprise

Origami Risk connects RMIS, EHS, GRC, claims, exposure, policy, and billing data in a single platform — creating clean, contextual, AI-ready information across insured and insurer operations.

Controlled and responsible by design

Every AI capability is opt-in, configurable, and governed through permissions and human oversight. You decide where AI is applied and how it supports your teams.

Practical AI. Real outcomes.

Origami Risk AI is designed to reduce friction, accelerate insight, and strengthen decision-making across risk and insurance operations.

Accelerate review and investigation

AI reads notes, reports, claims files, policies, audit documents, intake forms, and supporting materials to generate clear summaries, extract key details, and highlight what matters most.

Instead of sorting through pages of content, teams focus on decisions.

60%

reduction in time spent reviewing documentation. [\(McKinsey\)](#)

30%

increase in speed of claims triage and incident response. [\(McKinsey\)](#)

40%

improvement of quality across investigations. [\(MIT Management\)](#)

Surface patterns and trends faster

AI analyzes structured and unstructured data across programs to detect emerging risks and generate natural-language insights.

- Ask questions about your data in plain English.
- Identify patterns before they escalate.
- Strengthen risk mitigation and pricing decisions.
- Improve executive reporting and visibility.

From frontline operations to executive dashboards, insight becomes immediate and actionable.

Reduce administrative friction

AI assists with drafting communications, streamlining intake, answering user questions, and automating repetitive tasks that slow teams down.

- Generate follow-ups and summaries.
- Improve data capture accuracy.
- Accelerate internal and external communication.
- Free teams to focus on higher-value work.

AI handles the repetitive work so your experts can focus on judgment and strategy.

Maintain control while you scale

Origami Risk allows you to determine exactly where and how AI supports your workflows with granular, feature-level control.

- Enable or disable AI capabilities individually.
- Define which workflows AI supports.
- Assign access by role or user.
- Require human review before actions are finalized.
- Maintain secure, audit-ready logging.
- Ensure client data is never used to train public or shared AI models.

AI adapts to your operations. You stay in control.

AI becomes powerful when it is practical, governed, and built into the work you already do.

About Origami Risk

Origami Risk empowers leaders in insurance, risk, and safety with a purpose-built, cloud-native platform that optimizes workflows for better data, better insights, and better collaboration. Through highly configurable solutions integrated on a single platform, Origami Risk supports the management of the full lifecycle of risk, from prevention to recovery — helping the experts reduce harm and loss, and respond more rapidly and effectively when it happens. Grounded in continuous innovation and a foundational focus on client success, Origami Risk is trusted by leading organizations to enable greater resilience as they build for the future.
