

A single platform for RMIS, EHS, and GRC

Unify operational, safety, compliance, and financial risk data with embedded AI, workflow automation, and executive-ready visibility.

Organizations are under pressure to modernize technology, eliminate disconnected workflows, and deliver faster visibility into operational and financial exposure.

Origami Risk brings Risk Management Information System (RMIS); Environment, Health and Safety (EHS); and Governance, Risk and Compliance (GRC) together on one platform with embedded AI, configurable workflows, and centralized administration — helping teams automate manual processes, strengthen governance, and turn fragmented data into actionable insight.

Why organizations choose Origami Risk

Unified platform

Manage RMIS, EHS, and GRC workflows in one connected system.

Connected risk intelligence

Tie operational incidents and safety events to claims and financial impact.

Embedded AI

Apply governed, workflow-based AI across intake, routing, analysis, and reporting.

Configurable workflows

Adapt workflows, reporting, and governance processes without heavy IT dependence.

Benefits by role:

Insurable Risk Leaders

- Connect safety performance to claims and TCOR.
- Improve executive visibility into operational and financial risk.
- Automate renewals, claims, and incident workflows.
