

Deliver more value to your clients without adding operational complexity.

Origami Risk's RMIS solution gives your clients visibility into claims and risk. With our safety add-on for brokers, you can also provide practical safety capabilities that support incident prevention, compliance, and stronger client outcomes — helping them identify, manage, and reduce risk before losses occur.

Incidents		
INCIDENTS	EMPLOYEE	CLASSIFICATION
20244949531	Carter, Joan	Injured employee
20244949531	Ackerman, James	Injured employee
20244949531	Williams, Dan	Near-miss
20244949531	Hernandez, Thomas	Injured employee

Move from reactive claims management to proactive risk reduction.

Ensure workers and supervisors can quickly access accurate safety information during incidents, inspections, or audits.

- Capture incidents and near misses in real time.
- Standardize safety observations and inspections.
- Identify root causes with structured RCA (5 Whys, Fishbone).
- Assign and track corrective actions (CAPA).
- Improve visibility into leading safety indicators.

This allows your clients to create a more complete risk story by connecting what's happening in the field with what's showing up in claims data.

Purpose built for broker delivery.

The add-on is a targeted, broker-enabled safety solution designed to be easy to deploy and scale across your client base:

- Pre-configured safety workflows deployed at the broker level.
- Single database to manage multiple clients.
- Portal-based data entry (no named users required for most clients).
- Broker-controlled rollout and configuration.

You can deliver meaningful safety capabilities without heavy implementation, IT lift, or disruption to clients.

Strengthen your RMIS value proposition.

Adding Safety Management capabilities to your RMIS offering helps:

- Differentiate your brokerage through proactive risk services.
- Support clients in reducing frequency and severity of claims.
- Bring leading indicators into renewal and underwriting discussions.
- Increase client engagement and stickiness.
- Identify high-risk clients earlier and intervene proactively.

The Origami Risk platform enables a centralized, data-driven approach to better client service and measurable outcomes.

Start simple. Scale when your clients are ready.

This add-on is designed for broad applicability across your client base.

When a client's needs become more complex:

- As your clients' needs become more complex, they can transition to their own full Origami Risk RMIS and EHS implementation.
- Broker-referred clients receive preferred pricing.
- Brokers maintain visibility and partnership in the client relationship.

This creates a clear path from foundational safety tools → enterprise EHS maturity.

Why Origami Risk

- One platform connecting RMIS + EHS for a complete view of risk.
- Real-time reporting across incidents, actions, and trends.
- Flexible, configurable workflows without heavy IT reliance.
- Purpose-built for brokers and their clients.
- Extend your impact beyond claims — help your clients prevent them.

About Origami Risk

Origami Risk empowers leaders in insurance, risk, and safety with a purpose-built, cloud-native platform that optimizes workflows for better data, better insights, and better collaboration. Through highly configurable solutions integrated on a single platform, Origami Risk supports the management of the full lifecycle of risk, from prevention to recovery — helping the experts reduce harm and loss, and respond more rapidly and effectively when it happens. Grounded in continuous innovation and a foundational focus on client success, Origami Risk is trusted by leading organizations to enable greater resilience as they build for the future.
