

Enhance Operations Through Quality and Process Improvement

Healthcare quality teams need a connected system that captures data, structures workflows, and drives accountability from frontline rounding to executive reporting.

Origami Risk equips healthcare quality, patient safety, and risk teams with a unified platform to analyze data, improve processes, and reduce harm.

Investigate and learn from every event

- Conduct structured Root Cause Analysis (RCA) to surface findings and build trackable action plans.
- Use Healthcare Failure Mode and Effect Analysis (HFMEA) to identify risks before events occur.
- Track action plans to completion with automated follow-up and accountability workflows.

Standardize processes and protect quality

- Conduct comprehensive peer reviews with structured, documented workflows.
- Manage surveys and assessments that support accreditation and continuous improvement.
- Create, maintain, and distribute policies with version control and automated sign-off processes.

Control costs when losses occur

- Conduct EOC, employee, and leadership rounds online or offline with structured rounding templates.
- Run daily safety huddle workflows to surface risks and capture issues in real time.
- Feed rounding and huddle data directly into quality reporting dashboards.

About Origami Risk

Origami Risk empowers leaders in insurance, risk, and safety with a purpose-built, cloud-native platform that optimizes workflows for better data, better insights, and better collaboration. Through highly configurable solutions integrated on a single platform, Origami Risk supports the management of the full lifecycle of risk, from prevention to recovery — helping the experts reduce harm and loss, and respond more rapidly and effectively when it happens. Grounded in continuous innovation and a foundational focus on client success, Origami Risk is trusted by leading organizations to enable greater resilience as they build for the future.
